DECKING

We currently have three colours to choose from and we can supply WPC (wood/plastic composite) & heavy duty 100% plastic waste recycled decking with a 50 year guarantee.

Unlike wood, our recycled decking always looks like new.

No painting or staining is required for our decking.

Wood/Plastic Composite

FENCING

The Earth's natural resources are being used up at an alarming rate and where possible we must strive to find alternative material that can be sustained or recycled.

Our fencing posts and gravel boards are made from upto 100% recycled materials.

Installation of our recycled fencing is easy and straightforward. All our products are compatible with recognised building and fencing materials.

Our materials can be sawn and fixed using traditional methods. This material is available in a huge range of shapes & sizes.

OUTDOORS

Buying outdoor furniture is always easy. However the maintenance required every year is always a headache.

The benefits of greater durability, no paint or stain required and no rotting or splintering make it the perfect choice for outdoor use.

No More Painting EVER AGAIN...

50 YEAR GUARANTEE

Our WPC products are made from recycled and reclaimed wood and plastic. This new material combines the best of both in that, the plastic shields the wood from moisture and insect damage, so there is no rotting, cracking or splintering and the wood protects the plastic from UV damage.

With 1000s of uses please call us with your project details & we'll help you to choose the best products for your needs
